

XT Controlled Substance Manager

Close Gaps in Controlled Substance Management and Accountability

With government regulations expanding and drug shortages at an all-time high, pharmacy has a growing burden to account for all controlled substances throughout their health system.

The XT Controlled Substance Manager from Omnicell supports the daily challenges of managing controlled medications by automating manual processes. It saves valuable staff time while helping to meet DEA, ISMP, Joint Commission, and other regulatory guidelines. To protect patient safety and reduce hospital liability, XT Controlled Substance Manager provides full accountability of drug movement – from wholesalers, to the pharmacy and patient care areas, and back to the pharmacy.

Improve Security and Inventory Control

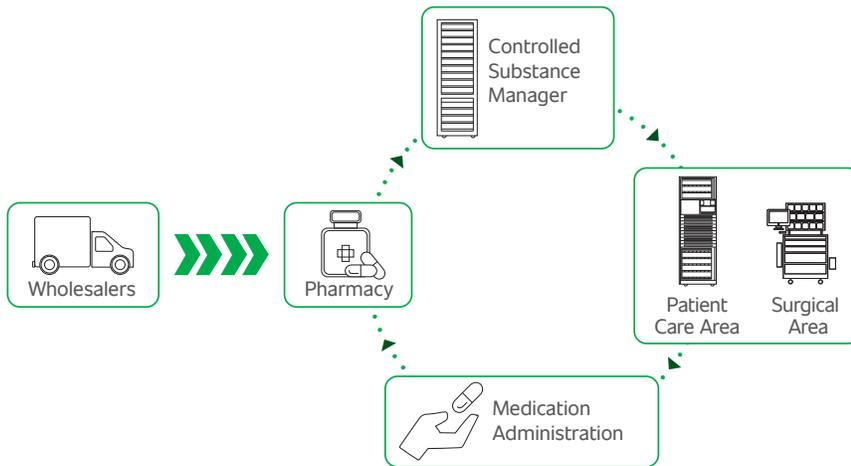

XT Controlled Substance Manager uses the latest Omnicell® XT Automated Dispensing Cabinet technology to improve controlled substance management workflows and increase security.

- **Greater Capacity** – Industry-leading capacity of the XT cabinet promotes optimal storage of controlled substances, improving efficiency
 - New XT supply drawer and pull-out shelf offer additional flexibility and greater storage capacity
- **Enhanced Security** – Advanced biometric identification with single-factor authentication reduces the risk of diversion
- **Increased Accountability** – Integration with Omnicell Automated Dispensing Cabinets creates closed-loop tracking of narcotics to and from the pharmacy
- **Increased Efficiency** – Results have shown 50% less time spent returning items to stock¹

Closed-Loop Tracking Supports Better Accountability

Centralized Database Improves System Administration

Unlike other controlled substance systems, Omnicell XT Controlled Substance Manager shares the same database as Omnicell Automated Dispensing Cabinets. This unified approach:

- Provides consistent patient, user, and formulary information
- Increases data accuracy, which can prevent billing errors
- Centralizes transaction data for easier audit trail and reconciliation
- Reduces redundant database management and need for costly interfaces
- Gives pharmacy staff more time to focus on patient care
